**Double Application E3/L3.** Heavy duty non-directional design. Rock service design provides excellent traction and flotation. Extra tough long lasting tread compound for cut and impact protection. Wide-base sizes offer wide cross section and tread.

A non-directional standard pattern depth tire produced for heavy duty off-the-road and industrial applications where the average operating speeds are higher. The flatter tread profile and optimized tread bar and tread groove design provide wider ground contact area for longer tread life. An excellent tire for use in any wheel position.
